Shower Enclosures & Trays

Twenty years of bathroom obsession

We understand bathrooms. Over 20 years the bathroom has evolved from a rationale space for washing and cleansing to an emotional one focused on relaxation and rejuvenation. In response, Crosswater has curated an extensive range of products to delight our customers, always.

At Crosswater, we readily embrace the latest cutting-edge manufacturing processes and design trends to provide a premium selection of enclosures, bath screens and shower trays, to deliver a truly exceptional showering solution. If it is a wet room you are looking for, we offer frameless shower panels and a selection of

low and level-access shower trays to help you create that seamless look. All of our shower screens are finished with 'Crosswater Clear' which helps reduce staining ensuring that your shower looks as good as new with each use.

Choosing your Shower Enclosure, Tray or Bath Screen

The Crosswater enclosures, trays and bath screen portfolio offers an exciting range of options which cover a vast variety of styles, finishes and performance benefits. Please follow the simple steps below to create your own personal showering enclosure.

step 1 CHOOSE YOUR SIZE AND ACCESS METHOD

Depending on your available space and design preferences you should start by choosing the size and access method that you require to contain your perfect shower experience.

Enclosures

Bath Screens

step 2 CHOOSING A SHOWER TRAY

Once you have determined the size and access method of your shower enclosure you need to select a matching shower tray.

Tray Height & Material

In most situations, consumers are looking to achieve the most minimal look in the bathroom and therefore gravitate towards our thinnest profile of 25mm. All Crosswater 25mm trays are crafted from natural stone resin with an even gel coat which is very strong, long-lasting and carries a lifetime warranty.

If you are looking for a stone resin alternative to our 25mm trays at a more competitive price point along with the lifetime guarantee, Crosswater offer a range of acrylic capped stone resin trays in a thicker 45mm profile.

Waste Options

Depending on the range specified, the consumer has the option to choose from waste positions. For more accurate waste positions and size information please refer to the tray pages, listed in the style finder.

Centre
A centre waste position offers the most direct route for the water to flow from the tray and its flush design prevents an uncomfortable standing position for the user.

Edge
This option moves the waste away from the standing area of the tray for a more comfortable user experience.

Linear
This option provides the cleanest lines and most minimal user experience.

All Crosswater trays require a separately specified waste (except 25mm stone resin and linear options). All Crosswater wastes are high flow removing 30 litres per minute. In 25mm stone resin, Kai and PLUS+TON® ranges a patented

VORTEX waste is used which removes the water much more quickly ensuring you are never standing in a pool of water at the base of your enclosure.

Finish Options

As well as the brilliant white colour in the 25mm stone resin range we offer a stylish Storm Grey finish. In the 'Kai' range, the consumer has the option of a reassuring anti-slip finish.

Crosswater is proud of its product quality and continued drive to offer the very best products. All our glass shower doors and panels fully comply with current regulations and is manufactured in accordance with BS EN14428. Meticulous testing of the glass ensures that the endurance, stability and water retention criteria meet the high industry standards.

Guide to Icons

Toughened Safety Glass

Available up to 10mm in thickness, our shower panels and doors come with toughened safety glass as standard, offering complete peace of mind.

Enclosure Height

We offer multiple height options on selected enclosure designs to create a tailored solution to fit every individual space.

Finishes

There is a range of finish options available on selected enclosure designs, to perfectly complement any bathroom scheme.

Adjustment for Easy Fitting

We allow for up to a 60mm adjustment on our enclosures, to ensure that installation is easy and adaptable.

Reversible Design

Whether your enclosure door needs to open to the left or right, our handy reversible function allows for either orientation.

Power Shower Proof

We have carefully developed and tested our shower enclosure screens to ensure they can withstand the optimum performance of a power shower.

Crosswater Clear as Standard

This invisible coating acts as a lasting barrier on the surface of our enclosure glass, helping to drastically reduce staining from water and chemical deposits. For more information see website.

Door Opening Options

Looking for space-saving folding doors, or opting for inward opening? Whatever your preference, there's a choice of designs available.

Lifetime Guarantee

The majority of our enclosures come with an impressive Lifetime Guarantee, covering all manufacturing defects to ensure long-lasting durability.

SHOWER ENCLOSURES

shower in style

A comprehensive collection of shower enclosures, opt for a variety of door styles, walk-in panels and handle options to create a tailored solution for you.

Design+ Matt Black

Elegance evolved

Black is the strongest of the neutral shades. Commonly associated with elegance, it is now available in the Design+ enclosure range increasing the creative opportunities and driving design continuity in the bathroom.

25mm Stone Resin Shower Trays with Linear Waste

The minimalist Slab tray is manufactured by hand in the UK from the finest natural materials

The Slab is load bearing and is installed the same way as any standard stone resin shower tray

For fitting on concrete or wooden floors (comprehensive fitting instructions included)

Fully complies with EN274 European standard for shower flow rates

A tough gel coat smooth surface, durable, repairable and easy clean

Fully load bearing stainless steel waste grid that is only 75mm wide, the tray still has an incredible drainage efficiency of over 30 litres of water per minute

At only 25mm high, the tray can be installed as a level access solution

Tray comes complete with a stainless steel flush fitting waste cover finished in white

Optional upgrade to Chrome cover available (LNGRID_C £45.00) or Matt Black (LNGRID_MB £45.00)

The waste design creates a self cleaning vortex for high water clearing performance

100% natural stone resin

25mm ultra low profile

Lifetime Guarantee

The waste outlet can now be fitted left and right making installation easier. When plumbed to the right, flow will be reduced to approximately 20-25lpm.

Tile weight - One of the great features of Crosswater Wet rooms is its strong adherence to tiles using approved cement based adhesives. This makes Crosswater Wet rooms an ideal product to use with heavy tiles such as natural stone. Dependant on the size of the tiles, Crosswater Wet rooms is suitable for tiles up to 50kg per m². Please ensure the appropriate adhesives and tapes are used in the installation of all Crosswater Wet room products. Failure to do so will invalidate the product guarantee. See page opposite for fixings and adhesives.

Level Access Installation

Wood Floors

Fixing a level access wet room onto a traditionally constructed board and joist floor is straightforward but it's recommended the work is carried out by a qualified professional. A feasibility site survey should also be carried out in advance to ascertain the length, direction of the waste and joists etc.

1. Remove floorboards to the nearest joist where the shower tray will be located.

2. Install the waste ensuring adequate run off.

3. Fix timber supports in between joists - these should be fixed low enough to bring your timber panels to the top of the joist.

4. Fix timber panels to support ensuring a level deck at joist height.

5. Fit shower tray and floor panels to entire floor area using board fixing adhesive and screws.

6. Seal all joints and fixings with waterproof joint sealing tape and corners. Your level access wet room is now ready to tile.

Concrete Floors

1. You will need to cut out the concrete floor to recess the waste and tray where appropriate.

2. Fit the horizontal waste into position within the concrete floor.

3. Fit the shower tray into position using fixing adhesive.

4. Fit waterproof corners.

5. Fit floor panels to entire floor area sealing joints with waterproof joint tape.

6. Your level access wet room is now ready to tile.

Information

Errors & Omissions

In the interest of continuing design, development and product improvement, Crosswater reserve the right to change colour, designs and product specifications without prior notice.

Lifetime Guarantee*

Crosswater showering products, unless otherwise stated carry a lifetime guarantee, which covers all manufacturing defects.

- The guarantee is only available to original purchasers who have proof of purchase.
- If the product has been installed, Crosswater must be given the opportunity to inspect the product in the installed condition.
- If the product is defective in materials or manufacture the original purchaser must contact our Technical Department within 30 days of the fault occurring. If the fault is not resolved the goods should be returned to Crosswater and at our discretion we will refund the purchase price, repair and return the goods to you or send new goods or parts to you as a replacement, this shall constitute our sole obligation under this guarantee. Crosswater cannot be held liable for any reinstatement costs or maintenance charges relating to the replacement of spare parts.
- Due to a continuous development program. If in our opinion the product has failed under the terms of the guarantee and a replacement is offered but identical goods are no longer available, Crosswater will replace it with our nearest equivalent product.
- This guarantee covers normal use, it does not cover faults caused by wilful damage, incorrect installation, neglect, misuse, inappropriate cleaning, accidental damage and other events outside Crosswater control.
- The guarantee does not cover any product that has been altered or modified in any way without the prior written consent of Crosswater.
- If a claim is made under the guarantee a site visit maybe required which is chargeable, if the defect is due to faulty materials or manufacturing Crosswater will refund the cost of the site visit.
- The guarantee is only valid for products purchased, installed and used in the United Kingdom.
- The guarantee does not cover ex-display units.
- The benefit of this guarantee cannot be transferred to a third party.
- The guarantee is in addition to and does not affect your statutory rights.
- The product should only be cleaned with warm soapy water. Aggressive cleaning fluids could damage the enclosure and will invalidate the guarantee.

- *All products carry a lifetime guarantee, with the exception of the following:
- Edge bath screen, Supreme Deluxe bath screen and all seals - 12 month guarantee
 - Wastes - 10 year guarantee

15 Year Guarantee*

All Crosswater brassware and shower valves, unless otherwise stated, carry a 15 year guarantee which covers all manufacturing defects. This guarantee does not cover damage during fitting, misuse or inappropriate cleaning or consumable goods. Care should be taken in hard-water areas to ensure the cartridge is regularly cleaned.

*With the exception of cartridges which carry a 5 year guarantee, and hoses, "o" rings, diverters and shower hoses which are all guaranteed for 1 year.

Product Compatibility

Whilst the majority of Crosswater products are compatible, care should be taken on product selection prior to ordering to avoid installation issues. Technical drawings are available on our website or on request.

Easy Installation

All products incorporate a clever width adjustment feature offering between 15mm and 60mm width allowance to cope with out of true walls, ensuring that they sit squarely on the shower tray. Most products are reversible for left or right hand fitting.

Installation Notes

Trays must be plumbed and level, walls should be tiled down to the tray and sealed before doors or frames are fitted. Dimensions are designed for tiled in trays - not unfitted tray sizes. All doors and enclosures must be fitted to a tiled surface, not tiled up to the inside edge of the door. Enclosures must not be completely sealed on the inside, please refer to fitting instructions. Due to the weight of the shower doors you must ensure that the walls to which fixing is to be carried out are of a suitable construction to support the enclosure.

For further advice, please contact Crosswater customer helpline: **0345 873 8840**

Visit your local bathroom specialist.

Expertise & design

Specialist bathroom retailers can offer expert assistance with room layout design and technical considerations. Many will do this in the comfort of your own home and can provide full 3D design plans so you can visualise and create your own perfect bathroom space.

Experience the products

The purchase process is an emotional one. Specialist showrooms allow you to touch and feel a wide variety of bathroom products in relaxed surroundings whilst gaining inspiration from knowledgeable professionals who will explain the benefits of each product and make recommendations that match your personal preferences.

Reassuring aftersales care

Once your perfect bathroom is installed, local bathroom specialists offer an easy and personal point of contact for any aftersales support you may need, delivering complete peace of mind.
