

hansgrohe

Ideas for water.

Shower heads and mixers
for bathrooms and kitchens.

The background of the entire page is a close-up photograph of water droplets on a dark, reflective surface. The droplets are of various sizes, some in sharp focus and others blurred, creating a bokeh effect. The lighting highlights the spherical shape and the way light reflects off the water's surface.

Experience water like never before.

Today, more than ever before, the bathroom and kitchen are the heart of the home. They are places where you can relax and spend precious time alone or with your family.

That is why we at hansgrohe are constantly developing solutions that ensure your everyday experiences with water are memorable. Explore this brochure and discover our latest innovations, where clever combinations of technology and design allows us to redefine your experiences with water.

hansgrohe. Meet the beauty of water.

The Hansgrohe company

Hansgrohe. The original – since 1901. Future-oriented from the beginning

Never satisfied with anything less than ground-breaking, Hans Grohe was a genuine pioneer, constantly striving for innovation. At a time when the idea of a bathroom in a family home was barely imaginable and a daily shower a flight of fantasy, he was already working on the first showerheads, setting new standards in bathrooms across Europe. Today

with thirty-four companies and twenty-one sales offices supplying one and hundred and forty-two countries worldwide, the hansgrohe brand is readily recognised as one of the few global players in the sanitary industry. Now as then, hansgrohe production remains mainly in the Black Forest region, endorsing its 'Made in Germany' maxim and continuing its founder's

original values. The Hansgrohe Group is also an industry pioneer in fostering sustainability and environmental protection. This is reflected in its water and energy-saving products as well as in eco-friendly production technologies, global environmental protection projects and particularly the sustainable handling of water as one of our planet's most valuable resources.

hansgrohe: leading from the front since 1901

Quality that you can rely on

Exceeding expectations everyday

At hansgrohe, German expertise enables us to achieve the highest level of quality in form and function. The 'Made in Germany' label has always been key to our success and will continue to be so. Almost all our products are made in our native Black Forest, in southern Germany. We strive to offer our customers sustainable solutions that set benchmarks in

terms of functionality and quality. This is why we have continually invested in research and development – just like we did on day one – so that we can ensure your lasting enjoyment. This modern innovative strength, combined with our traditional expertise, has created the foundation for a company whose success will continue into the future.

Environmental responsibility: Sustainability and climate change are key considerations in everything hansgrohe does. Our worldwide conservation projects and informative work on the preservation of water resources help improve the ecosystem. We employ renewable energies, efficient recycling systems and heat recovery during production to reduce CO₂ emissions. Choosing hansgrohe means choosing long-lasting quality and ecologically-responsible manufacturing.

**5 YEARS
GUARANTEE**

Highest standards: hansgrohe only uses high quality materials that are approved for use with drinking water. They are subjected to vigorous tests to assure their compliance with all kitchen requirements. All single parts comply with the relevant standards and are fitted with optimal precision for safe ease of use and convenience for years to come. The guidelines have drawn ourselves for product safety exceed by far most of the specifications standard in the industry. For this reason, we offer a manufacturer's warranty of five years on all of our products.

Industry stimulus: At hansgrohe approximately 30% of our turnover is achieved with products less than three years old. It's this capacity for fresh new ideas that makes us one of the most innovative leaders in our industry. Many new products initiated, developed and designed by hansgrohe become successful all over the world. Some of them have made industry history and some have even made cultural history.

Award for outstanding design

The ultimate way to design your everyday

Design is not a question of taste for us. It's a philosophy. Working together with the Phoenix Design team – who have won multiple international awards – we consistently strive to create outstanding designs. Our core priority is to find the smartest solution possible. Only when design and function go hand in hand can we create products of exceptional quality

that are able to set new benchmarks. The Hansgrohe Group has won over 500 awards in 50 international design contests. The iF Design Award is an internationally renowned trademark that recognises exceptional design. This award is a globally established symbol of outstanding, innovative design skills and is one of the world's most important design

awards. It is awarded annually by the independent international design institution. The iF Company Ranking 2017 confirmed the Hansgrohe Group in sixth place, making it the highest-placed sanitaryware company of those participating in the iF Ranking.

hansgrohe showers and mixers

Water doesn't get any better

hansgrohe

Shower control

Exposed installation solution

Are you looking to create the perfect shower with as little effort as possible? Whether you're installing a new shower or retrofitting an old one, hansgrohe's exposed products such as hand showers, shower sets, Showerpipes and thermostats will add value to your bathroom, both in terms of function and design. A wide range of exposed solutions cater for every taste and type of shower, turning your daily shower into a special

experience. All products have been designed to be installed on existing plumbing – making it simple and easy. In other words, these products don't need to be integrated into the wall. All water-carrying elements are fitted in front of the wall, so they can be retrofitted easily at any time. Even changing single elements, such as a hand shower, can have a significant impact. Why not enjoy the benefits of this easy solution?

Renovation made easy

Could your bathroom do with being freshened up? Design and technology are ever-changing – and so too, are the demands we place on our bathrooms. Or are you looking for energy efficiency? Or perhaps a solution that doesn't involve tearing down a wall or carrying out major renovations? If so, look no further than the wide range of products that can be mounted easily on the wall! These products feature standard-sized connections so that all hansgrohe products, including thermostats and hand showers, will fit your bathroom. These products add genuine value to your bathroom, both in terms of function and design.

Greater comfort and flexibility

The shower bars are sturdy, allow easy motion and have been designed for easy cleaning. They enable you to fix hand showers at the perfect height – whatever your size, age or showering position. The Unica Comfort is a practical solution designed with all generations in mind. It doubles up as a hand rail, supporting up to 200 kg. hansgrohe solutions provide the whole family with increased comfort, greater grip and increased flexibility – and also reduce the risk of slipping in the bath or shower.

Quick solutions for overhead showers

Would you like a more sophisticated shower, or have you always wanted a larger shower head? A Showerpipe is perfect as an all-in-one solution – greater comfort, a larger shower head and a more enjoyable shower experience. The hansgrohe Showerpipe includes an exposed thermostat, overhead shower and hand shower. Your dream of a large rainfall shower can be turned into reality quickly and easily, without having to rip open the wall. It can simply be installed on the wall using the existing plumbing.

Shower control

Concealed installation solution

Wouldn't it be nice if everything related to the operation of the shower? Thanks to the hansgrohe concealed installation system, all of this can be hidden neatly behind the wall. The technology for our concealed shower controls are integrated in the wall. We recommend

asking a plumber to carry out the installation. Because this system is divided into two parts, one in front of and one behind the wall. This gives you flexibility, should you ever want to change them in the future.

More room

The minimalistic shower controls sit snug against the wall – creating an ultra-modern, uncluttered effect. The hansgrohe technology is concealed behind the wall, putting the emphasis on the design and leaving you more room. You'll now enjoy more freedom, greater comfort and a more pleasurable shower experience.

Maximum enjoyment

Select technology, the intuitive control and design concept, is a particularly neat, user-friendly solution concealed behind the wall. ShowerSelect thermostats enable you to select the shower settings at the touch of a button, while RainSelect can be programmed for up to five options. You can also change the type of shower spray with a simple push of a button. The integrated temperature control ensures a constant level of comfort, while the flow of water can be adjusted at any time.

A multitude of designs

What sets hansgrohe's built-in products apart from all others is our concealed technology, a design that integrates perfectly into the wall and is remarkably simple to use. The slim contours, exclusive finishes and shapely elegance create an impression of space. Not only can you choose between a multitude of different design forms, but also between different finishes: chrome, white and chrome, black and chrome or reflective glass.

Shower control

Exposed and concealed installation solutions

Would you like to create a clean, uncluttered shower, yet still enjoy the benefits of a shelf? With hansgrohe exposed and concealed solutions, you can enjoy the best of both worlds. The hansgrohe ShowerTablet thermostat features a spacious glass shelf to hold all your shower accessories, so there's no longer a need for a shower caddy. hansgrohe overhead showers can be installed on the

ceiling or wall. Not only do we have a wide choice of shapes – round and traditional or square and modern – but we also offer different spray patterns. Puristic design adds a touch of sophistication to any bathroom. Whatever you choose, the result is guaranteed to be stunning – with maximum comfort and your own, individual touch.

Scope for design

Greater comfort in the shower, with your shower controls and shower accessories exactly where you want them. You choose where you want to install the thermostat and overhead shower – and the exact position of the hansgrohe ShowerTablet. Depending on your individual shower preferences, you can position the shelf, thermostat and showerhead head according to your individual requirements.

Spacious shelf

hansgrohe ShowerTablet thermostats are incredible all-rounders. Available in 30- or 70-centimetre-wide designs, the convenient shatter-proof glass shelf provides plenty of space for storing all of your shower accessories. That way, you'll always have your toiletries close to hand. The exclusive design of the thermostats adds a touch of sophistication to any bathroom. The smooth finishes – in mirrored chrome or fresh white and chrome – not only look elegant, but they are also easy to clean, sturdy and scratch-resistant.

Clean lines

Innovative and functional design rolled into one. The thermostat can be fitted straight onto existing plumbing, with the pipe leading to the shower head concealed behind the wall. In other words, there are no unsightly pipes or parts. Blending harmoniously with any style of bathroom.

Various spray modes for hand and overhead showers make showering even more enjoyable

The right spray, however you like to shower

Once your skin has experienced the heavenly caress of hansgrohe spray modes, you won't want to settle for anything less. We develop and refine our different sprays in our in-house 'spray laboratory', ensuring

that these meet your individual expectations. Whether you want a shower to relax or for an invigorating burst of freshness, our different spray modes cater for all needs.

Simply scan the code for a video about our different spray modes.

NEW

PowderRain

A unique shower experience thanks to the soft caress of micro droplets.

Heavenly micro droplets

PowderRain is much finer than other spray types. Instead of just having a single hole, the jets now have up to six fine openings that disperse the water into thousands of velvety soft micro droplets that caress the skin and swathe it in a cocoon of water.

Reduced noise

Significantly quieter shower for stress-free showering. Dreams start here.

Less splash

Because PowderRain splashes much less, you have less cleaning to do in the shower – a huge benefit if you have an open shower.

Economic and sustainable

The PowderRain hand shower not only saves you up to 20% water, but also saves you the energy for heating the water

IntenseRain

Rinsing out shampoo is easy with the strong IntenseRain water spray. Perfect for setting yourself up for the day. The IntenseRain spray not only rinses out shampoo, but it also washes morning tiredness down the drain – for a refreshing start to the day.

TurboRain

The all-purpose tool for quick results: The revitalising TurboRain spray lives up to its name. The pure power of the most powerful of all Rain sprays provides a refreshing shower experience. For those who like things to be quick and straightforward.

Mix

Gentle and dynamic at the same time. The mix spray combines the rich, soft RainAir spray with the strong, revitalising CaresseAir spray. Soft drops wrap themselves around the body, while a warm targeted water flow in the middle massages the skin. The perfect combination for daily showering pleasure.

Rain and Rain XL

The openings on the hand or overhead shower may be small, but their effect is all the greater: The Rain spray revitalises and refreshes with its pleasant power enveloping the body. It is therefore ideal, for example, for rinsing out shampoo quickly and thoroughly.

RainAir and RainAir XL

If you are looking for relaxation and you want your soul to be pampered by the water. The hand or overhead shower with the luxurious RainAir spray would be perfect for you. This spray provides air-enriched drops from a large, wide jet, to wash your cares away.

SoftRain

The gentle SoftRain water spray gently wraps itself around the body. A treat for the skin – and for the soul, of course. Whether a daily shower or for relaxation, the SoftRain spray is always the right choice. Its strengths come into their own in a quick shower in the morning and in a long soak in the bath after a hard day.

Whirl

The concentrated Whirl spray simply washes away the exertions of the day. Whether hand or overhead shower: Three single sprays revolve around each other for an intense massage effect that dissolves tension.

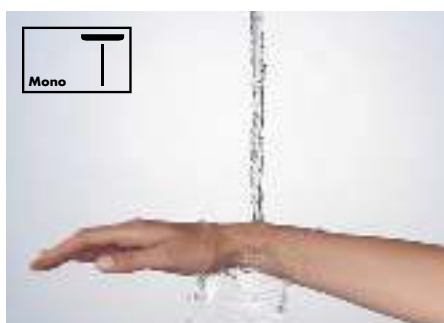

CaresseAir

Five strong single sprays combine in a revitalising, strong massage spray for pleasant relaxation. Just the thing after exercise or a hard day at work – good as new in minutes.

Massage

A concentrated spray that simply washes the day's stress away. The targeted spray easily relaxes tense areas. The innovative circular arrangement of the sprays turns the shower into a mobile wellness treatment for the home bathroom.

Mono

A targeted, soothing relaxation spray from the centre of the shower. The lightness of the Mono spray helps you to unwind, making it the perfect spray for relaxing.

RainFlow

An overhead shower with the clear, beautifully shaped RainFlow cascading spray brings the waterfall experience to the bathroom. This lets you enjoy water in its natural form, as a cascade from above on the neck and shoulders. This can be directed specifically to these parts of the body and tension quickly disappears. This is a trend especially in the wellness bathroom.

RainStream

The new RainStream of single sparkling jets is a crowning achievement of the hansgrohe spray developers. These special overhead shower sprays do not constrict, but remain unvaryingly revitalising and intense right down to the floor. The result: a new, revitalising shower experience, irrespective of the user's height.

The ideal shower head, however you like to shower

Hand showers

The new Select technology on the hand shower now makes showering even more enjoyable. Instead of having to adjust the spray face, you can select one of three different sprays with a simple click of a button. Our hand showers also look stunning.

Available in a round or square design, in pure chrome or chrome gloss with a white spray face – they not only feel good, but look good, too! What’s more, they are more environmentally friendly: The intelligent flow limiter on the EcoSmart models reduces

water consumption by up to 60%, as well as energy consumption. Upgrade your showering experience, as hansgrohe hand showers fit all shower hoses.

Raindance® Select S 120 3jet P

26014, -000

NEW

Limescale deposits can be wiped away simply by rubbing a finger over the flexible silicone lamellae.

You can change the type of shower spray intuitively with a touch of a button.

A unique shower experience thanks to the soft caress of micro droplets.

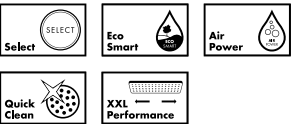

An intense massage whirl for easing tensions.

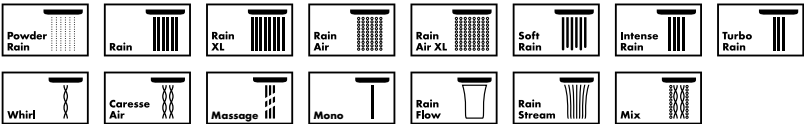

A powerful rain spray, bringing your body an invigorating burst of freshness.

Perfectly composed

Shower sets

hansgrohe shower sets, consist of a hand shower, shower bar and shower hose. These are convenient, unique and reliable combinations for your shower or bath. They are suitable in any style of bathroom and

can be installed easily onto existing fittings or plumbing. And as we offer sets for virtually all of our hand showers, you really are spoiled for choice. A hansgrohe shower bar is sturdy, easy to clean and comes with a smooth

running shower slider. It allows you to fix the shower head to the perfect height – whatever your size, or showering position. The shower slider can be conveniently angled so it can be adjusted to your specific needs.

Shower controls for the ultimate shower experience

Shower controls: exposed

hansgrohe offers a broad selection of exposed thermostats. These not only add glamour to your bathroom, but they will also improve your shower experience. The intuitive controls enable you to easily regulate the water volume, pressure and temperature.

Exposed thermostats are an ideal, stress-free solution for smartening up your bathroom. They can be installed on existing plumbing. Be your own judge of the first-class, elegant design, amazing functionality and reliable hansgrohe quality. ShowerTablets are

incredible all-rounders: A range of innovative functions allow you to create your ideal shower or bath. Glass shelves provide plenty of space for your shower accessories. And the puristic design adds a touch of sophistication to any bathroom.

A comprehensive system for all your shower needs

Showerpipes

Everything about the Showerpipe is lovely and simple. This shower system combines hand and overhead showers, as well as a thermostat, into one product. There's no need to install every water outlet separately.

You simply install the shower system onto your existing plumbing – the perfect solution for straightforward bathroom refurbishments. Your dream of a large rainfall shower can be turned into reality quickly and easily. You can choose

between a one-, two- or three-spray overhead shower with hand shower and thermostat. The Select button on the hand shower, overhead shower and thermostat make it even easier to select the shower and spray type.

The most beautiful rain in the world

Overhead showers

The hansgrohe range of overhead showers gives you the choice of round or square heads, strikingly angular designs or softly rounded corners. They are available in chrome, or an attractive combination of white and chrome. The shower heads in the Rainmaker Select collection are the crème

de la crème in terms of design. The spray disc is made from shatter-proof glass – either modern white or elegant blank. Depending on the type of overhead shower, there are three different options: The shower head can be either installed on the wall with a shower arm, or fitted overhead on the ceiling. By selecting

one, two or three different spray modes, you can enjoy a unique shower experience, just the way you like it. The spray mode can be changed easily using the Select button in the centre of the spray disc, or via the hansgrohe thermostat.

Operation in all its tremendous variety

Shower controls: concealed

hansgrohe's diverse range of built-in solutions provides you with incredible scope when designing your bathroom. You'll be surprised at how many functions and designs there are. Built-in solutions not only look

great, but also create more space. We've got the perfect product to match your bathroom fittings (hand shower, overhead shower, shower system). These can be combined with any hansgrohe shower head. Smarten up your

bathroom with shower controls in chrome, or with a black and white glass finish. The different designs – in a round, square or soft-cube – blend harmoniously with any style of bathroom.

RainSelect Thermostat concealed for 2 functions

15355, -400

NEW

Integrated hose connector with metal holder. (Hand shower and hose not included – please choose and order separately).

Available in three finishes:

The RainSelect thermostat brings unprecedented elegance to the bathroom. This new method of installation involves the use of thin superstructures on the wall, resulting in a sophisticated, raised effect. Needless to say, this opens up brand new design options. However, the RainSelect also has much to offer in terms of functionality. The innovative, intuitive Select technology allows it to be configured multiple ways. It also features an integrated holder for the hand shower. Create the design you want with a choice of three different finishes: white and chrome, black and chrome or all chrome.

The hangrohe built-in range offers the perfect product for your needs and budget. The first decision you need to make is how you want to operate your shower. Would you like to control the shower head and the spray by turning, or with a touch of a button? You then have a wide range of options for the actual design. The ShowerSelect thermostat comes in a square or angular design, available in chrome and with a black or white glass finish. Ecostat thermostats are available in a square or round design, or with rounded corners. There is a wide choice of attractive fittings, all blending harmoniously with the bathroom.

Contemporary. Harmonious. Functional.

The Modern collection

Modern bathrooms need modern solutions. A contemporary design language is critical, but so, too, is functionality and product experience. This approach sets benchmarks in terms of form and function. It creates a calm room characterised by clean lines and

sensuous shapes. In a stylishly furnished home, the modern bathroom is much more than just a place to carry out your daily beauty ritual. A contemporary-styled bathroom is a personalised retreat where you can savour your time.

Tradition and function at their very best.

The Classic collection

Some things manage to transform the traditional concept of beauty. This kind of design combines traditional values such as elegance, warmth and harmony with modern elements. Balanced shapes deliver timeless design. A design language that

equates to traditional beauty, and radiates a warm, harmonious atmosphere. A classic bathroom owes its individual character to the combination of modern spatial planning, innovative technology and graceful design elements.

Award-winning design in white and chrome.

The Avantgarde collection

Instead of chasing tomorrow's styles, your bathroom should be a reflection of your own style. Those who appreciate individuality are bound to fall in love with our Avantgarde collection. You can give your interior a special kind of sensuality by incorporating the playful

elements of emotional design. The creative style of Avantgarde bathroom design makes it the perfect match for an exclusive interior. These extravagant fittings are as much at home in a modern building as they are in a luxuriously renovated old property.

hansgrohe

PuraVida

Bath mixer or design object? There's no telling the two apart in the PuraVida collection. With striking forms – in classic chrome or a combination of finishes – PuraVida mixers bring a new dimension to bathroom design. The DualFinish surface treatment ensures a distinct definition between the white and chrome finishes, underlining the stark contrast. Scratch-resistant powder-coating ensures lasting satisfaction. Another highlight of this collection is the avant-gardist pin handle that allows easy, intuitive operation. The outstanding sophistication of the PuraVida collection has won it many design awards – and made it a favourite among design fans.

hansgrohe kitchen mixers

The heart of the kitchen

hansgrohe

hansgrohe Kitchen mixers

Our perfect solution for convenience in the kitchen

The heart of the kitchen is the place where fresh water flows. This is why hansgrohe is continually developing new ideas to ensure that your use of water is as convenient as can be. Smart technology and ergonomics are key product features that increase efficiency

and make the kitchen more enjoyable. Thanks to the ComfortZone, you can enjoy a wider working radius at the sink. The pull-out function gives you even more room at the sink. Water can be turned on and off precisely when you need to using the Select button on the spout.

This not only saves water and energy, but the simple touch of a button can also make light work of any job in the kitchen. The minimalistic design blends stylishly with any ambience.

**Changing the spray:**

You can change the spray on a two-spray kitchen mixer with a simple push of a button. You can choose between standard flow and shower spray, depending on whether you want to fill a container quickly or rinse delicate foodstuffs.

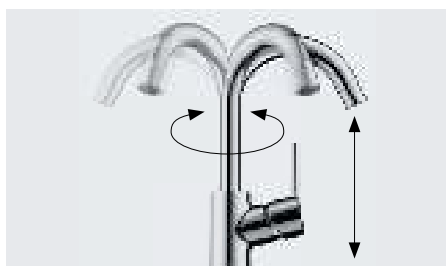

**Pull-out function:**

The pull-out spray and pull-out spout significantly extend the working radius at the sink.

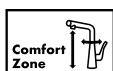

Select technology:

Turn the water on or off with a simple push of a button. The Select button can also be operated by the back of your hand or your elbow, keeping the mixer nice and clean.

ComfortZone:

The swivel function comes in very handy when working to the right or left of the mixer. High containers such as saucepans, large vases and water bottles can be filled more easily at the sink.

hansgrohe sinks: Discover the full kitchen range online!

NEW

Combine our kitchen mixers with your favourite sink from the high-quality hansgrohe range. Our sinks are available in hand-welded stainless steel or natural 'SilicaTec' granite. The SilicaTec sinks come in three different colours to make your kitchen even more unique.

hansgrohe sinks and sink combinations can be found at www.hansgrohe-int.com/kitchen

hansgrohe Kitchen mixers

Stylish selection for an individual dream kitchen

The kitchen is the place where family and friends gather to cook, eat, relax and celebrate. Are you looking for a smart kitchen mixer with a chic design, which makes your life easier in the kitchen? hansgrohe offers a wide

selection of kitchen aids that are more than just simple mixers. Because when you've got your hands full while you're cooking, it's great when you don't need your hands to operate the mixer. The Select technology allows you

to turn the water on and off with a simple push of a button. Thanks to the ComfortZone, the high spout provides you with plenty of elbow-room, while the pull-out function enables an even greater working radius.

The pull-out function significantly extends the working radius at the sink.

By pressing the Select button, you can turn the water on and off while you're working.

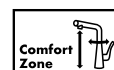

Combines water with a generous amount of air. For a soft, splash-free water spray and rich, full drops.

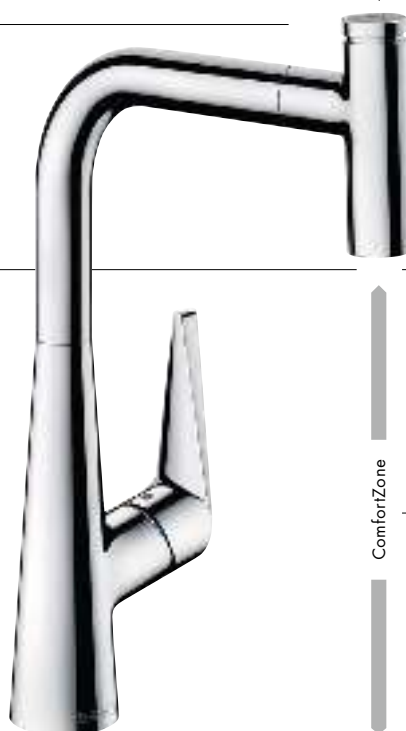

Wipe limescale deposits away easily by rubbing your finger over the flexible silicone nubs.

You can choose between two different finishes: traditional chrome or stainless steel. Both surfaces are resistant to abrasion and scratch-proof.

Plenty of room under the high spout, so that large saucepans can be filled easily.

ComfortZone

Something to suit. The hansgrohe ComfortZone defines the unique working space between the washbasin and the mixer, making it more user-friendly and preventing those unwanted splashes.

Metris 260
High flexibility: high spout for more elbow-room.

Metris 230
Extremely convenient: even large containers can be filled easily.

Metris 200
Simply practical: filling a watering can is no longer a problem.

Metris 100
Compact and functional: the perfect solution for small washbasins.

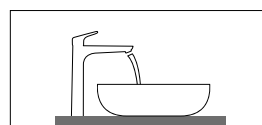

ComfortZone test.

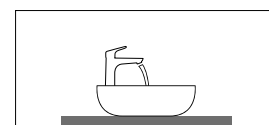

Which mixer goes with which basin? What is the correct height for a mixer to avoid those annoying splashes? And how much room should be left between the washbasin and mixer for ultimate convenience? Developed by hansgrohe, the ComfortZone test – carried out in realistic testing conditions – has enabled the company to test the performance of more than 12,000 combinations comprising hansgrohe mixer and the most common washbasins of leading manufacturers. The test includes measurement of the space between the mixer and the washbasin, splash behaviour at different water pressures, and splash behaviour when washing hands.

You can find the results and our recommendations at www.hansgrohe-int.com/comfortzone-test

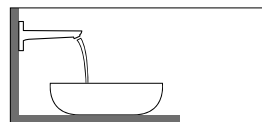

Regardless of the interior design or shape of washbasin you choose, hansgrohe always has the perfect mixer.

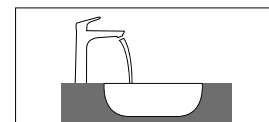

Mixer behind free-standing top-mounted basin or wash bowl.

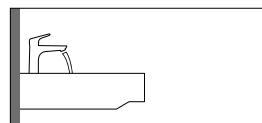

Wash bowl with top-mounted mixer.

Wash bowl with wall-mounted mixer.

Mixer for flush-fitting or built-in basin.

Wall-mounted washbasin with top-mounted fitting.

Select

Happiness at the touch of a button. Select technology in the shower allows you to switch to another spray mode or another shower head. On bath mixers, this button switches the water on and off.

Hand showers and overhead showers.

Select technology on the hand shower or overhead shower allows you to switch to different spray modes at the touch of a button.

Thermostats.

Thanks to the integrated Select technology, the water can now be turned on and off exactly when you need it by simply pushing a button on the thermostat. Stylishly integrated into the thermostat, Select buttons enable you to select the spray modes as well as the shower head.

Mixers.

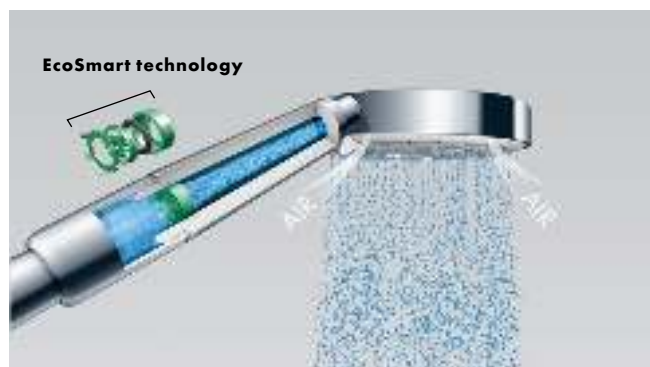

The prominent Select button ensures easy operation of the mixer. You turn the water flow on and off at the touch of a button. And if necessary, you can even control the mixer without your hands, simply by using your arm or elbow.

Technologies by hansgrohe

EcoSmart

Minimum water. Maximum pleasure. The EcoSmart technology is cleverly concealed within the product reduces the flow rate to save water and energy. For sustainable use of water.

Showers.

Back in 1987 Hansgrohe developed the Mistral Eco hand shower – a hand shower that not only used half the amount of water but also saved precious energy used for heating the water. Today, EcoSmart showers use only six or nine litres per minute, saving up to 60% of water and energy consumption.

Mixers.

EcoSmart mixers also save a significant amount of water during everyday bathroom use. Thanks to this technology, we have been able to lower the consumption of our basin mixers to just five litres per minute – as standard.

Technologies by hansgrohe

QuickClean

The quick solution for improved cleanliness. The handy QuickClean technology allows you to remove limescale deposits easily by rubbing them off gently with your finger.

Showers.

All our showers have flexible silicone jets. Any deposits are quickly removed simply by rubbing a finger over them. Well looked-after limescale-free products are not only aesthetically pleasing, they work more efficiently and last longer.

Mixers.

To make it easier to clean the bathroom and kitchen mixers, the aerators in our mixers are fitted with flexible silicone lamellae. Simply rub them with your finger to loosen any limescale deposits. This makes sure that your mixers look beautiful, and stay working for longer.

Technologies by hansgrohe

AirPower

Innovative ideas for lasting happiness. AirPower technology adds generous amounts of air to the water, creating a soft, splash-free spray whilst at the same time delivering rich, full water droplets.

Showers.

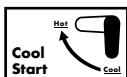

Large volumes of air are drawn in through the shower head's spray disc. This is cleverly combined with the in-flowing water, resulting in air-enriched droplets that are larger, lighter and softer. Not only does this feel great on your skin, but it also significantly reduces the amount of splashing.

Mixers.

The AirPower mixer injects air into the in-flowing water, which not only makes the water less likely to splash, but also gives the water a unique feeling.

Technologies by hansgrohe

CoolStart

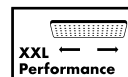

Cold water flows when opened in the basic setting. You consume hot water only when you need it.

Mixers.

CoolStart is our latest sustainability initiative: When the mixer is turned on, cold water flows as standard. Hot water is not initially produced – therefore energy is not used – until you actively turn the mixer to the left. This feature is available as an option for our washbasin and kitchen sink mixers.

XXL Performance

Water distributes over the large spray face. Enveloping the whole body in drops of well-being.

Showers.

By smartly distributing the water over a large area, the shower swathes your body in a wonderfully relaxing and comforting spray. Paradise in the shower!

A source of inspiration and information

A website which will help you realise your bathroom and kitchen dream.

Inspirational product pages, creative apps such as the 'dream bath' locator, and information services help consumers identify their items products from our extensive product range. Pages dedicated to trends and innovations also provide inspiration for designing bathrooms and kitchens. With the help of our site, design fans are able to realise their design dreams within their own home. And

all from the comfort of their own sofa! Besides being a source of inspirational ideas and information, the website focuses on providing services to help with design planning. Whether you are building your own home, renovating or updating your bathroom, the bathroom adviser will help you to find the ideal shower head, mixer, control units and technology. The kitchen adviser provides excellent product

solutions for the sink area – the heart of the kitchen. To find your nearest expert showroom, simply consult the hansgrohe specialist retailer search. Backed up by GPS, the shop finder is ideal when you're on your smartphone. All products and detailed information can be found at **www.hansgrohe-int.com**

The hansgrohe Showroom app

The hansgrohe Showroom app lets you experience our showers, bathroom fittings and other products virtually. Your chosen product is positioned in the middle of the screen while you take the photo – providing you with an impression of the product in situ.

Special features:

- photo function lets you visualise the product inside your own bathroom
- Videos about technology and different spray modes
- Your favourite hansgrohe products
- Find your nearest specialist retailer

Experience hansgrohe as part of your everyday.

More than just a bathroom showroom

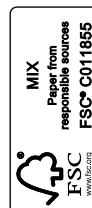

Why not visit the Hansgrohe headquarters in Schiltach in the Black Forest and try out our brand's products for yourself? Whether you're building a new home, renovating an old one or simply love innovative design, you'll find the bathroom showroom simply irresistible. With all of our different collections on display, the showroom is a source of innovative ideas for the modern

bathroom where you can see and experience the different mixers and shower heads for yourself. Modern bathroom designs are showcased in a welcoming environment, allowing you to discover the technical features of your dream bathroom. You can find your favourite shower head and try out different shower systems. Simply register with us and book a private appointment, to receive

a personalised experience. You can also discover what modern day convenience looks like in the kitchen. Our showroom gives you the chance to try out and compare products at your leisure, as well as be inspired. This will enable you to make well-founded decisions about your bathroom and kitchen.
